The Power Lynx 3 is always on-line eliminating noise, spikes, surges and brownouts. When the utility fails, the PLX3 will continue to provide AC voltage without the slightest interruption. The PLX3 generates an output sine wave that uses a high frequency PWM. The output Transformer isolates your critical load from any source of noise, so that your equipment is always protected. It's comprehensive monitoring checks each output, and input individually so you always know what is going on with your critical load. Alarm settings are field adjustable via the front panel. A microprocessor will store any alarm so a history is always available.

You deserve the **peace of mind** that the Power Lynx from **DSPM** ensures.
